Allowable Subject Matter

Claims 17-32 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 17 recites, " addition of multiple time-shifted copies of the received signal to said original received signal to obtain a sum of the original received signal and its time-shifted copies, wherein the time shift of a copy is related to said predefined pattern, and providing a reconstruction of an original burst signal having an improved signal to noise ratio from said sum to determine characteristics of the fluid flow". This feature, in combination with the remaining claimed structure, avoids the prior art of record.

Claim 24 recites, " storing a signal representing said sequence of ultrasonic burst signals at a second transducer, adding multiple time-shifted copies of the received signal to obtain a sum of the original received signal and its time-shifted copies, wherein the time shifts are related to said predefined pattern, providing a reconstruction of reconstructing an original burst signal, determining the travel time of said reconstructed original burst signal, and calculating the flow characteristic of the fluid using said travel time". This feature, in combination with the remaining claimed structure, avoids the prior art of record.

The reason for allowance of claim 32 is as stated in the Office Action dated 6-14-2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen J. Cherry whose telephone number is (571) 272-2272. The examiner can normally be reached on M-F 8:00-4:30.
